Durable Powder Coated Frames

Aspen Collection

-FRAME-

Aluminium is an ideal material for outdoor furniture in Australia. It is low maintenance and offers some nice clean lines. As well as a heavy gauge aluminium we have additional reinforcing channels employed throughout the frame. This fully welded frame provides unparalleled strength especially important with the long spans on two and three seater models.

-FINISH-

The aluminium is coated with a dry powder and baked to produce a uniformly coloured, hardened surface. We have also opted for a better quality powder, using “Tiger” powder coat. We have used now on thousands of furniture pieces and found it far more resistant to scuffing and scratching than other brands.

-SUNBRELLA-

Sunbrella high performance outdoor fabric gives you peace of mind to leave the cushions outdoors as the fabric is water, mildew and fade resistant. It is globally recognised as simply the best performing outdoor fabric you can get with a 5 year warranty.

-TEXTALINE BASE-

To facilitate easy drainage we have a durable PVC mesh panel on the base of all cushions. This ensures that any moisture will work through the foam and always allows the cushion to breathe.

-CUSHIONS-

WE have developed the perfect construction by combining a high quality medium density, quick drying foam with a high loft thermofill wrap to provide extra cushioning. Essentially we create a pillow-top cushion that maintains shape and support with a soft topping.
